WO 98/08867 (and its English-language European
counterpart application, EP 933379 A1, submitted
herewith) and articles (1) and (2) listed above were
cited in an International Search Report that issued in
connection with International application No.
PCT/JP00/05753, from which the present application claims
priority. For the Examiner's convenience, a copy of the
International Search Report is attached hereto.
Applicants have not enclosed copies of these documents,
except EP 933379, because they were supplied by the JPO
search authority in connection with United States
application No. 10/070,974, the parent application of
United States application No. 10/229,819 from which this
application is divided. However, if the Examiner wishes,
applicants will provide copies of these documents.

Articles (3), (4) and (5) were cited in a
Supplementary European Search Report in a counterpart
application. For the convenience of the Examiner, a copy
of the Supplementary European Search Report is attached.
Applicants have not enclosed copies of these articles,
nor JP 60-34955, nor articles (6), (7), (8), (9) and

(10), because they were provided in connection with United States application No. 10/070,974, the parent application of United States application No. 10/229,819 from which this application is divided. However, if the Examiner desires, applicants will provide copies of these documents.

Applicants respectfully request that these documents be (1) considered by the Examiner prior to issuance of any patent from this application; and (2) printed on any patent that may issue from this application. Applicants also request that a copy of enclosed Form PTO-1449, as considered and initialed by the Examiner, be returned with the next communication.
